TRUMPET WITH PISTON VALVES

Apply to bell of horn and other outer surfaces to ward off corrosion and impart a gorgeous buffed appearance.

Apply to valve slides and lead pipe to prevent oxidation and corrosion.

Apply to valves and slides to lubricate, reduce friction, and prevent sticking or sluggish play.

Apply to mouthpiece and receiver for protection from pitting, saliva corrosion, and for punchy response.

Apply to valve slides and lead pipe to prevent oxidation and corrosion.

HEAR & FEEL THE DIFFERENCE®

BRITETone® gives horn and other orchestra players a total instrument-care maintenance solution with a specialized lubricant formula that lifts away and removes dust and grime, then provides a micro-thin lubricant barrier that facilitates silky-smooth playing response. Valves, mouthpieces, keys, slides, and tubes react instantaneously and experience less wear due to reduced friction after the easy one-step application.

New conditioning technology for brass and wind instruments

Until now, there have been limited options for the care and lubrication of horns and other brass, winds, and all other metal components of band instruments. SoundSynergie's BRITETone® is designed to remedy that situation with a specialized lubricant formula that lifts away and removes dust and grime, then provides a micro-thin lubricant barrier that banishes noise and facilitates silky-smooth playing response. BRITETone® also gives brass and metal surfaces an attractive finish, but will not act as a polish or stripper like other maintenance formulas—those can damage fine finishes of brass instruments. Once applied, the formula will not migrate or build up, and is safe and gentle for fine wood and metal surfaces.

The Choice of Serious Horn Players

BRITETone's breakthrough conditioning and lubricant formula provides total maintenance for band and orchestral instruments where accuracy and noise-free performance is crucial. Friction, sticky or sluggish response from your instrument can mar an otherwise flawless performance, BRITETone® prevents these potential problems in one easy step. Formulated for use on high-precision instruments, BRITETone® excels on conditioning metal surfaces including brass, nickel, chrome, and silver. Use BRITETone to make sure that your horn puts out punchy, articulate tone every gig: ensure that BRITETone® Lube in your road case. Three sizes are ideal for use in the shop, touring, or in the studio.

BRITETone®—Uniquely Effective, Environmentally responsible

BRITETone's non-toxic formula is made expressly for use on all metal parts and surfaces of horns and other band & orchestra instruments, and is silicone- and teflon-free. The proprietary formulation is the culmination of years of research and development in flex-film technologies, and has been a cornerstone of private label products since 1986.

The Science of SoundSynergies®

Watch video of a sound technician using BRITETone® to restore and condition a trumpet.

BRITETone® . . . Independently Tested. Proven Effective.

Above right are Scanning Electron Microscope images of a Trumpet Valve (inside) before-and-after application of BRITETone®. The images clearly show the significant ability of BRITETone® to lift away action inhibiting grime and corrosion for improved glide.
